

BACKUP AND STORE YOUR FILES/PICTURES/EMAIL TO YOUR CD BURNER USING NERO! THIS "PROJECT BASED" CD CREATION SOFTWARE IS BETTER & MORE RELIABLE THAN XP'S OWN DRAG + DROP METHOD~!

NERO EXPRESS SIMPLE DATA BACKUP

1. Double click on the "NERO EXPRESS" ICON located in your Start bar.
2. **From the opening screen you must verify/set the CDRW or DVD Disk Media type (CD/DVD) as per the dropdown Pick List on the Top Right,**
3. Click on the **DATA DISK** Option and then Click **NEXT**.
4. Verify a proper DVD or CDR/RW **Blank disk** is inserted and continue to the next screen where you will locate files for backup (transfer) to the CD disk. Don't worry, files are only COPIED not MOVED to the CD disk.
5. **Click the ADD Button.** A File Browse window will appear. Locate and highlight the files and click the ADD Button to include them in your CD Burn Project. Left click and drag files/folders to the CD Project file list. Remember! Disk selection must be chosen in advance as per Step #2.

TIP: A graphical bar will appear (at the bottom) **during** the File selection to monitor the TOTAL amount of data selected. For **CDR disks** allow around 650MB; for a standard **DVDR+** disk allow for up to 4.3 GB. Newer dual layer (**DL**) DVD-R can hold up to 8.5 GB of Data. For best results – close other programs while burning.

6. **Repeat the file locate and ADD process** until the disk is full or you have completed your file selection(s). Observe disk size **limitations** per the bar at the bottom. Multi-session disks may be re-used. A check box makes this optional. Note: "Multi-session" refers to certain disks that allow multiple burn sessions.
7. **When done close** the Nero **file selection** window and click the **Burn** Button.
8. Click **Burn** again or as necessary to launch the CD Burn (Write) process.
9. If your Burn process includes the **Verify Option**, the disk may briefly open/close the CD drive just prior to verification of your data. Verify is recommended.
10. **Complete** the CD Burn as normal. **The CD will eject when done.** Label it with a Sharpie Pen or use Memorex CD-DVD labels with Nero CD Label tools as practical. **TIP:** It is not required to "SAVE" your CD Projects, just exit as usual.
11. **Reinsert the Disk to test/confirm normal readability** by browsing the Files in **My Computer**. Simply click on the appropriate drive letter (usually D: or E:).

NOTE: NERO is not a substitute for a fully automated business grade Backup + Restore program! Contact us if you need reliable, automated DATA BACKUP.

- Other Music mixing and CD Duplication tools are included with Nero and are worth exploring!
- Interested in Music downloads? A high quality music collection can easily be yours by visiting www.real.com. You'll find a free CD burner and MP3 music software and a large selection of 99 cent music downloads covering Rock, Jazz, Classical etc.
